BM&FBOVESPA S.A. Announces Results for the Fourth Quarter 2011

Company's IT investments on track, boosting efficiency

Cost control a priority in 2011; remains a key focus in 2012

Significant market diversification: HFT, Co-location, ETFs and *Tesouro Direto*

Shareholder return of R\$0.79 per share in 2011 from Payout and Share Buybacks

São Paulo, Brazil, February 14, 2012 – BM&FBOVESPA S.A. (BVMF3) today reported fourth quarter earnings ending December 30, 2011. New strategic areas such as Securities Lending, *Tesouro Direto*, ETFs and High Frequency Trading (HFT) performed well in the quarter. Successful implementation of the derivatives and spot FX modules of the PUMA Trading System and forward momentum on the multi-asset integrated clearing system further boosted the Company's technological edge.

BM&FBOVESPA announced an adjusted expense¹ budget range of R\$580 million to R\$590 million and a capital expenditure budget range of R\$230 million to R\$260 million for 2012. The adjusted Opex range equals the range for 2011 as a result of the Company's cost-cutting improvements.

"We remain focused on capturing the growth opportunities offered by the Brazilian market," said BM&FBOVESPA Chief Executive Officer Edemir Pinto. "The execution of our investment program to strengthen our IT infrastructure and the launching and development of products and markets, such as ETFs, HFTs and options on single stocks, are aligned with this goal. We are also taking actions to strengthen market supervision, which will help make the Brazilian market more attractive to investors. Mr. Pinto added, "We highly welcome the government's decision to remove an IOF tax on equity investments by non-residents."

During 4Q11, net revenues were almost flat year-over-year. This reflected a decline in trading volumes which was offset by a 39.5% increase in other revenues. Expenses were higher as a result of a one-time extraordinary transfer of restricted funds to strengthen the BM&FBOVESPA Market Supervision (BSM) while adjusted expenses were well in line with the Company's announced budget range. Adjusted EBITDA² margin was relatively stable at 65.2% compared to 66.5% in 4Q10. Adjusted net income³ per share declined by 1.0% year-over-year.

Other operating and financial highlights:

- 107.1% year-over-year growth in the Average Daily Trading Value (ADTV) of Exchange Traded Funds (ETFs); 61.1% rise in assets under custody of *Tesouro Direto*; 56.8% increase in the open interest of securities lending.
- 79.8% increase in the Average Daily Trading Volume (ADV) of stock indices contracts and 69.0% growth in the ADV of mini contracts in BM&F segment.
- Strong momentum on delivering the next modules of the PUMA trading system, building the new integrated clearinghouse and developing an OTC platform.
- Recommendation of R\$226.7 million in dividends, amounting to R\$912.3 million in 2011.

Chief Financial and Investor Relations Officer, Eduardo Refinetti Guardia, said: "Our strong focus on cost control throughout 2011 enabled us to reduce the level of expenses during the year. For 2012, the same strict controls will be maintained so we can keep costs at the same level. We also reinforced our commitment with returning cash to our shareholders."

(in millions of R\$)	4Q11	4Q10	3Q11	4Q11/4Q10 (%)	4Q11/3Q11 (%)	2011	2010	2011/2010 (%)

¹Expenses adjusted to expenses associated with the Company's stock options plan, depreciation, provisions, tax on dividends from the CME Group and contribution to MRP (Investor Compensation Mechanism Fund).

²EBITDA adjusted to expenses associated with the Company's stock options plan and contribution to MRP.

³Net income adjusted to eliminate deferred liability recognized in correlation with temporary differences from amortization of goodwill for tax purposes, the impact of the stock options plan and the investment in associates (CME Group) accounted for under the equity method net of taxes, taxes paid overseas to be compensated and fund transfer to the BSM.

ANALYSIS OF 4Q11 FINANCIALS

REVENUES

Gross revenues were R\$522.0 million, almost flat in comparison to 4Q10 and down 4.6% against the previous quarter⁴.

Trading and settlement revenues from the Bovespa segment were R\$223.8 million (42.9% of gross revenues), representing a 13.5% year-over-year reduction, as subdued market performance and activity reflected wider concerns of a weak global macroeconomic environment. Trading and post-trading (transactions) revenues in the Bovespa segment were down by 13.6% compared to 4Q10, following a 5.5% decrease in trading volumes. Continued growth in the total value traded of HFT and day trades, which are charged discounted fees, contributed to the fall in Bovespa segment margins to 5.58 bps from 6.11 bps.

Trading and settlement revenues from the BM&F segment totaled R\$177.2 million (33.9% of the gross revenues), a 2.1% reduction compared to 4Q10. Decline of 6.1% in trading volume for the BM&F segment was partially offset by a 5.3% rise in the average Revenue per Contract (RPC). Higher participation of longer maturity Brazilian Real-denominated interest rate contracts and an increase in stock index contracts, with above-average RPC, resulted in the average RPC rise.

Gross Revenues – 4Q10 over 4Q11 (R\$ millions)

Revenues not related to trading and settlement activities reached to R\$121.1 million (23.2% of gross revenues) in 4Q11, a 39.5% increase year-over-year, following growth in securities lending and a non-recurring revenue gain from the reversal of certain provisions for legal contingency and collection of credits owned by a bankrupt company. Highlights for 4Q11 included:

Securities lending: This segment continues to grow, registering a 55.7% gain over 4Q10. Revenues for 4Q11 reached R\$21.6 million (4.1% of gross revenues), attributed to the higher level of activity in securities lending services. The average financial value of open interest positions rose by 56.8% over 4Q10.

Depository, custody and back office services: Revenues from these services reached R\$23.5 million in 4Q11 (4.5% of gross revenues), mostly flat compared to 4Q10. A highlight is the *Tesouro Direto* custody product which continued to perform well with a 25.9% revenue increase over 4Q10. This rise was offset by a 4.8% decline in revenues from other depository activities, as the average number of accounts and the average financial value under custody⁵ fell by 4.7% and 10.3%, respectively.

Market data sales (Vendors): Revenues for this segment reached R\$16.3 million in 4Q11 (3.1% of gross revenues), representing a 3.0% increase year-over-year. An average year-over-year foreign exchange appreciation of 3.8% of the US Dollar against the Brazilian Real had a positive impact on US Dollar-denominated revenues from non-resident clients.

Listing: Revenues were R\$10.7 million (2.1% of gross revenues) in 4Q11, 4.2% lower than in 4Q10 as a result of reduction in initial listing requests.

Other revenues: Other revenues rose to R\$29.4 million in 4Q11 (5.6% of gross revenues), mainly due to a R\$22.6 million reversal of provisions for legal contingencies and collection of credits owned by a bankrupt company (former broker).

⁴ The quarter-over-quarter decrease is partially explained by fewer trading days in 4Q11 (61 trading days) compared to 3Q11 (65 trading days).

⁵ Excluding the ADR balance and non-resident investors who are exempt from the depository variable fee.

EXPENSES

Expenses totaled R\$291.6 million in 4Q11, up 54.6% year-over-year, due mainly to a extraordinary non-recurring expense from the transfer of \$92.3 million to strengthen the BSM.

Contribution to MRP (guarantee fund passed to BSM⁶). Expense connected to a transfer of the management of the Guarantee Fund, a fund with a sole purpose of reimbursing investors for losses arising from improper intermediary actions that may lead to complaints to the MRP as provided for in Brazilian securities regulations. The transfer of the fund will unify the management of resources related to MRP under BSM what enhance its self-sufficiency and allows the expansion of its operations, thereby bringing greater security and benefits to the market. The Company will book this one-time transfer of R\$92.3 million into expenses. The only ongoing impact to the Company will be the loss of the financial income derived from the management of this fund.

Adjusted expenses were R\$163.9 million in 4Q11, an increase of 3.1% year-over-year. Adjusted expenses for 2011 were R\$584.5 million, within the Company's 2011 guided budget of R\$580-R\$590 million.

Adjusted Expenses

(in millions of R\$)	4Q11	4Q10	3Q11	4Q11/4Q10 (%)	4Q11/3Q11 (%)	2011	2010	2011/2010 (%)
Operating expenses	291.6	188.7	169.6	54.6%	72.0%	816.7	633.5	28.9%
(-) Stock options programs	10.4	9.4	8.5	10.6%	22.0%	53.6	30.9	73.4%
(-) Depreciation	22.1	18.9	20.7	16.9%	7.0%	75.2	54.8	37.2%
(-) Provisions	0.2	-0.7	1.4	-126.2%	-87.2%	1.1	-0.1	-1279.3%
(-) Tax on dividends from CME	2.7	2.0	2.6	35.6%	1.2%	9.9	4.0	148.5%
(-) Contribution to MRP	92.3	-	-	-	-	92.3	-	-
Adjusted operating expenses	163.9	159.0	136.3	3.1%	20.3%	584.5	543.9	7.5%

Personnel: Personnel expenses totaled R\$85.0 million in 4Q11, falling 5.9% year-over-year due to higher distribution of profits and Company earnings to employees in 4Q10. Compared to 3Q11, personnel expenses rose by 5.0% mainly from an increase in the expenses associated with the Company's Stock Option Program and collective bargaining agreements of around 7% on payroll signed in August 2011.

Stock option plan expenses grew by 73.4% year-over-year as the Company granted stock options plans in 2011 but not in 2010.

Adjusted personnel expenses: Excluding the impact of stock option expenses, adjusted personnel expenses were R\$74.6 million in 4Q11, an 7.8% decrease year-over-year reflecting the above-mentioned decline in profit sharing. (See reconciliation table provided in annex).

Data processing: Data processing expenses totaled R\$32.5 million, a 14.4% increase over 4Q10 due to higher costs of hosting the BM&FBOVESPA's contingency Datacenter and expenses to maintain hardware and software used in the PUMA Trading System. Data processing costs were up 28.3% from 3Q11 due mainly to one-off IT expenses that were related to a security information project and some evolutive maintenance of systems.

Depreciation and amortization: Depreciation and amortization expenses of R\$22.1 million represent a 16.9% increase year-over-year, mainly due to increased Company investments.

Third-party services: Third-party service expenses of R\$19.0 million were up 18.4% from 4Q10, due to hiring of consulting services for several strategic projects, including the conducting of participant audits for the Operational Qualification Program (PQO).

Marketing and promotion: Marketing and promotion expenses in 4Q11 reached R\$8.0 million, a 29.8% decrease year-over-year, which reflects reprioritization of the Company's marketing and promotion activities for the year.

Communications. Communications expenses of R\$5.0 million in 4Q11 registered a 26.6% drop year-over-year as BM&FBOVESPA renegotiated telecom services agreements and successfully executed the Electronic Investor Channel (CEI) campaign. The goal of this campaign is to encourage investor access to custody statements and trade notices directly through the Internet, reducing postal service costs.

⁶ The BSM is an independent company wholly owned by BM&FBovespa. It is responsible for monitoring the transactions and activities performed by market participants and clearing and/or custody agents. It is also responsible for managing restricted funds used to reimburse investors in specific situations: the MRP (Investor Compensation Mechanism Fund) for the Bovespa segment and now the Guarantee Fund for the BM&F segment. Prior to the transfer to the BSM, the Guarantee Fund was recorded on the Company's balance sheet as part of the restricted cash balance and the income from the Guarantee Fund was recorded as financial income.

Others: Other expenses in 4Q11 reached R\$19.1 million, a 147.1% increase over 4Q10, as R\$7.8 million in projects were written off in the quarter.

OTHER FINANCIAL HIGHLIGHTS

Cash and cash equivalents: Short- and long-term cash, cash equivalents and financial investments at the end of the quarter ending December 30, 2011 amounted to R\$3.8 billion. Of this, R\$1.6 billion is mainly related to third-party collateral pledged to the Company's clearing facilities and R\$379.7 million⁷ consists of restricted financial resources tied to the clearing safeguard structure. Unrestricted cash and cash equivalents available at the end of the quarter totaled R\$1.6 billion.

Indebtedness: At the end of 4Q11, the Company had R\$1.2 billion in interest-bearing and principal debt outstanding, primarily comprising senior unsecured notes issued in July 2010.

Equity-method investment: The Company's net share of gain from investment in the CME Group, applying the equity-method, totaled R\$131.5 million in 4Q11, primarily due to the CME Group results year-over-year, mainly the non recurring impacts from a reversal of tax provision during the quarter, and the effect of the Brazilian Real depreciation against the US Dollar during the quarter. It is worth to mention the records of R\$62.9 million from tax benefits to be offset related to taxes paid abroad. Out of this amount, R\$44.9 million have been offset against current income tax and social contribution payable, such as discussed below.

Net interest income: Net interest income for 4Q11 was R\$64.1 million, a drop of 11.3% year-over-year, reflecting an increase in financial expenses. Financial expenses rose to R\$22.2 million in 4Q11 from R\$18.9 million in 4Q10, resulting from the depreciation of the Brazilian Real against the US Dollar. The 5.4% decline in financial revenues is mainly related to the year-over-year reduction in the average Brazilian interest rates.

Income tax and social contributions: Income tax and social contributions totaled R\$184.0 million in 4Q11. Of this amount R\$45.8 million was recorded as current taxes, including R\$44.9 million offset against taxes paid abroad as mentioned at the Equity-method investment, remaining R\$0.8 million as current taxes impacting cash in the quarter. The line Deferred taxes and social contribution amounted to R\$138.3 million in 4Q11 due mainly to temporary differences from amortization of goodwill for tax purposes. Deferred income tax and social contributions have no cash impact.

CAPEX: Investments of R\$88.5 million were capitalized in 4Q11. Total CAPEX accrued during the year ending December 30, 2011 totaled R\$204.0 million, which was within the 2011 investment budget (from R\$180.0 million to R\$210.0 million).

Dividends: On February 14, 2012 the Company's Board of Directors recommended a R\$226.7 million as dividend distribution to be approved in the ordinary general meeting. The total distributed will reach R\$912.3 million, 87% of GAAP Net Income, or 80% of GAAP Net Income adjusted to the impact of the R\$92.3 million transfer to BSM.

Share buyback program and stock cancelation: On December 13, 2011, BM&FBOVESPA's Board of Directors approved the extension of the Company's Share Buyback Program up to 60 million shares ending in June 2012. As of January 31, 2012, 29.6 million shares had been repurchased, which represents 49.2% of the total program at an average price per share of R\$9.21. Additionally, on December 13, 2011, the Board approved the cancellation of 64,014,295 shares of the Company which were being held in treasury. As a result, the share count of the Company is 1,980,000,000.

PERFORMANCE BY SEGMENT

Bovespa Segment

- The ADTV for the Bovespa segment fell by 5.5% year-over-year and by 2.7% compared to 3Q11. This decrease is due mainly to a fall in the market value of listed companies.
- Areas of growth include:
 - HFT: The ADTV for HFT in 4Q11 represented 10.3% of the total volume compared to 4.3% in 4Q10, taking into account data for November and December when the discount policy for HFT was introduced.
 - ETFs: The ADTV for ETFs rose by 107.1% year-over-year and 23.5% over 3Q11.
 - *Tesouro Direto*: The number of investors accessing this product grew by 56.7% and custody volume rose by 61.1% year-over-year.

⁷ Restricted funds totaled R\$467.9 million in 3Q11 and included the Guarantee Fund (R\$92.3 million) which was transferred to the BSM in 4Q11.

BM&F Segment

- The ADV for BM&F segment in 4Q11 was down 6.1% year-over-year. The main contributing factor was a 16.4% drop in volumes of traded contracts in Brazilian Real Interest Rates, due to lower levels of uncertainty related to the decisions made by the Central Bank of Brazil on the course of the monetary policy. A 79.8% rise in traded volumes of stock indices partially offset this reduction.
- HFT represented a 7.2% share in the total volume traded in the BM&F segment in 4Q11, compared to 5.0% in 4Q10 and 7.8% in 3Q11.

UPDATE ON STRATEGIC INITIATIVES

In 4Q11, BM&FBOVESPA made strong progress on several strategic projects aimed at market development and diversification of the Company's long-term revenues. These initiatives will also help the Company boost its technological edge and strengthen its competitive position.

Progress on new clearing integration system

On October 24, BM&FBOVESPA signed an agreement with Swedish firm Cinnober for a perpetual license of the TRADExpress Real Time Clearing system. This investment will provide the Company with a robust and flexible clearing technology, integrating its current four clearinghouses into a single post-trading system. The new clearing system will transform the post-trading landscape in Brazil. Its multi-asset, multi-market risk management architecture, CORE (CloseOut Risk Evaluation), will permit a consolidated risk management among different classes of assets and contracts, granting users of the Exchange's clearing systems greater efficiency in the allocation of capital. BM&FBOVESPA will also have total autonomy in the control and maintenance of this platform and will be allowed to market this new clearing system. The clearing system will be developed through 2012 with integrated market testing and the start of implementation slated for 2013.

PUMA Trading System multi-asset trading platform

The Company is on track to implement modules for stock trading for the PUMA Trading System over the course of 2012, once the development of this module was concluded and the testing phase has already started. The first module of the project, involving derivatives and spot foreign exchange in the BM&F segment was completed in the second half of 2011 and is currently in operation.

Development of a new OTC trading platform

BM&FBOVESPA entered into partnership with the US-based company Calypso Technology to jointly develop an OTC registration and trading management platform, which will provide greater agility, safety and quality to its customers. The new technology will help deepen the services offered by the Company. The project is divided into three modules, the first of which is expected for delivery in the second half of 2012.

Options Market Maker Program

The goal of the Options Market Maker Program is to enhance liquidity in the Bovespa segment's options market. Market makers for options on BM&FBOVESPA ON, Itaú Unibanco PN, OGX Petróleo ON, Usiminas PNA stocks and the Ibovespa index were selected in 2011. New market makers have been chosen for options on Bradesco, Gerdau, Banco do Brasil, CSN, PDG Realty and Cyrela. Operations for the latter three stocks will be initiated in the beginning of April 2012.
