NOTICE TO THE MARKET

GTS operations on May 26, 2009

BM&FBOVESPA announces that trading activities on the derivatives and commodities markets of the BM&F segment have been suspended this morning from 9:50 to 10:18 a.m. due to technical difficulties related to the GTS electronic system (Global Trading System).

The system shutdown was caused by two overlapping events:

- ✓ Failure of one of the primary servers that support trading activities in GLWIN stations;
- ✓ High availability solution failure, given that on detecting the primary server failure it should have allowed for proper system operation through the secondary server, which it did not.

The Exchange IT team will be conducting a detailed analysis of the root causes of these difficulties with a view to reducing the possibility of similar future events.
