Notice to Market

Clarification on a statement of the Chief Operating and Information Officer of BM&FBOVESPA

Further to a statement of the Chief Operating and Information Technology Officer of BM&FBOVESPA, Mr. Cícero Augusto Vieira Neto, which is included in a news report published in today's issue of the *Valor Econômico* newspaper, BM&FBOVESPA clarifies that given the recent increase in volumes traded on the equities market, and in anticipation of additional growth, it intends to double the daily processing capacity of Bovespa segment trading systems to 3.0 million daily trades, from 1.5 million currently, which improvement is scheduled to be completed in 2010. The estimated amount of our investments to improve processing capacity accounts for less than half the R\$116 million in capital expenditures forecast for 2009.

São Paulo, August 31, 2009.
