Notice to the Market

Trading and Settlement/Clearing Fees (Rebalancing Policy) and the Block Trading Facility

BM&FBOVESPA S.A. - Bolsa de Valores, Mercadorias e Futuros (the "Company") announced that, on February 8, 2011, will submit to the brokers, a presentation regarding the revision of its fee structure.

The purpose of this review is to realign the trading and post-trading activities' fees, adjusting them to the Company's cost structure, with no impact on overall transaction costs for investors who trade in the BM&FBOVESPA markets.

This review is tied to the adoption of new accounting principles, pursuant to Law 11.638, since September 2010, which motivated the process of revision of costs and results related to trading and post-trading activities. The studies so far have shown evidence that the costs currently associated with post-trading activities represent at least 65% of the Company's total costs.

On the same occasion, the Company will also present its project to develop a trading platform for large orders in the stock market (Block Trade Facility), opportunity when will be discussed issues related to the reduction of the impact on the price and market volatility, possible impacts on the regular market, operational model, international experiences, definitions and examples of block trading systems and required regulatory approvals.

São Paulo, February 1st, 2011.
